Math Practise

Tuesday is quiz day. I have reviewed all your work to date and there are many of you who are making little mistakes while you work resulting in very poor marks. This is to give you extra practice this weekend and help you get into the habit of estimating and checking your work against the estimates.

All work must be done on a separate page of paper. Follow the directions for each question. Once completed, go back and check your answers with a calculator. When you have an incorrect answer **fix it**, discover where you went wrong; this is where the learning takes place.
Take the time to slow down, CHECK, and FIX as this is what will benefit your learning.

Estimate

1. a) 5.46 + 3.78 =

   b) 12.7 + 4.2 =

   c) 8.95 – 3.42 =

   d) 4.5 – 2.9 =

Estimate and then do actual calculations

2. a) 2.567 + 6.87 =

   b) 12.432 – 4.56 =

   c) 3.41 + 7.3 – 6.08 =

   d) 14.345 – 8.32 + 4.692 =

Calculate

3. a) 5.6 x 0.4 =

   b) 1.42 x 0.7 =

Estimate

4. a) 9.34 x 2.4 =

   b) 11.34 x 7.1 =

Estimate and then calculate actual
5.

   a) 2.5 x 4.3 =

   b) 1.99 x 6.2 =
